ATHLETIC TOURNAMENT PLEASANT VIEW MAY AT OGDEN ARMORY

A wrestling tournament has been arranged for at the Armory building this week. It is expected that there will be three nights of wrestling among the amateurs of the city. The object of the contest is to work up enough interest with the athletic fans to organize a wrestling team in Ogden with the view of competing with the Y. M. C. A. of Salt Lake.

Those who are promoting the propo-

sition are confident that Ogden has as good material for the wrestling game as any other city in the western country, and it is hoped that some-thing may be done to bring that talent to the front and present it to the pub-lic in such way as to warrant successful training and contests. The contests at the Armory will be

held, Monday, Wednesday and Friday nights of next week. The main con-test Monday night will be between James Cleary and Arthur Chester, with preliminary bouts.

The Wheelwright Construction company has taken the contract to re-move the timbers and iron, of the de-stroyed county bridge from the river bed at the mouth of Ogden canyon, and is now busily engaged in the work.

It is not known just how long it will require to remove the wreck, so as to enable contractors to begin the construction of a new bridge, but it is expected that it will not take more than a few days' time. County Commissioner Madison said

yesterday that the erection of a new bridge would be begun as soon as possible, and that in all likelihood it would be built of concrete. By placing concrete abutments on either side of the river, the bridge span can be materially narrowed and the bridge, as a whole, thus made much stronger than before.
The commissioner said that the

removal of the old bridge timbers and steel was delayed until an understanding could be had with the Utah Light & Railway company, as to the responsibility for the wreck. The work that is being done now is at the instance of Engineer L. L. Dagron of the Light

John Pumphrey had an inning in the municipal court again yesterday morning for drunkenness. John has been before the court a number of times during the past few months for overindulgence in the use of intoxi-cants, and in each instance he has been sentenced to five days' imprisonment. Waltham Watches

Warning

The Waltham Watch Company in order to preserve the reputation of their watches and in order also to pro-tect the people who buy Waltham Watches, hereby warn every one intending to buy a good watch, Waltham or any other, that it is not safe to buy a watch by catalogue from any of the mail order houses.

Buy a watch from a jeweler or watchmaker—because—a professional watchmaker before he delivers you the watch you have bought will overhaul it, correct any damage that may have happened to it, see that it is properly oiled, and in short, get it running right and keep it right. The retail jeweler's own reputation is at stake when he sells you a watch

It is very different when you simply order from a catalogue, send on the money, and get just a watch.

Waltham Watch Company Waltham, Mass.

N. B. - When buying a watch always ask your jeweler for a Waltham adjusted to temperature and position.

MUKE COAL REACHES

Most of the coal dealers of the city are quite cheerful today because of the relieved condition of the coal situation. A number of them say that with the supply that came into the city yesterday and this morning they have been able to supply coal in limited quantities to all the people who had ordered coal from them, and that many who had never before dealt with them had been accommodated with a supply of fuel.

There are some yards in the city however, that have no coal and there is but very little of it in any of the yards, but the deliveries of yesterday so lessened the demand that it is expected that the coal that will arrive daily from this time forward will be sufficient to supply the immediate

needs of the consumers.

The moderated condition of the weather has had a great deal to do with relieving the distress. The temperature is so high that but very litperature is so high that but very lit tle coal, comparatively speaking, is required, except for cooking pur-
